Express Desk

The Auto Exec Express is one of the most versatile desks in our line. The rear storage tray is removable, making it only 20" from back to front (the desk measures 26" with the rear attachment in place). The hinged top opens to double the work space. The work surface has a non-skid material to keep items from sliding. The 11" of height in the seat will be enough to clear the center console and the desk can be secured with a seatbelt.

The grip area when open: 22" x 14" and 10" x 14" when closed. Wt. 10lbs. The built-in carry handles make it a true "desk on the go."
